EDUCATION

California State University, Fullerton

Completed May 2026

Bachelor of Science, Computer Science

Coursework: Object-Oriented Programming, Linear Algebra, Discrete Mathematics, Software Engineering, Filesystems & Databases, Machine Learning, Data Science, Applied Artificial Intelligence

TECHNICAL SKILLS

Development: Python, JavaScript/TypeScript, React, Next.js, Node.js, HTML/CSS, C++, Java, SQL, Material UI, Git/GitHub, Docker, Vercel

AI & Data: OpenAI, Azure AI Foundry, Semantic Kernel, Retrieval-Augmented Generation, Pinecone, Gemini, TensorFlow, NLP, OpenRouter, Autogen, MCP

Cloud & Tools: AWS, Firebase, PostgreSQL, Clerk, PyCharm, CI/CD workflows

EXPERIENCE

Software / AI Engineer, Robert Half / Protiviti

Aug 2025 - Present

Remote

- Engineering a ChatGPT-like web search workflow with built-in validation and grounding logic so outputs remain traceable in production use cases.
- Developing multi-agent connectors to Salesforce Agentforce, expanding automation across internal GPT workflows and business systems.

GenAI Engineering Intern, Robert Half / Protiviti

Jun 2025 - Aug 2025

Remote

- Architected and deployed a production-ready multi-agent workflow that automated data extraction and analysis across 8 internal and external sources.
- Designed grounded AI workflows with Azure AI Foundry and Semantic Kernel, cutting 3-5 hours of manual work per request for a market research team.

AI Security Researcher, Walt Disney

Sep 2024 - Jan 2025

Anaheim, CA

- Led cross-functional AI security research and implementation work under NDA, with emphasis on controlled AI system behavior.

Software Engineer, Develop For Good

May 2024 - Sep 2024

Remote

- Engineered a React web application to streamline volunteer distribution for more than 15,000 people across 65 underserved villages in Colombia.
- Integrated interactive mapping features with the Maps API to improve resource allocation and outreach context.

PROJECTS

LearnlyAI

github.com/SalmaanRauf/LearnlyAI

2024 - 2025

- Built an AI flashcard platform using Next.js, Firebase, and model-backed content generation for structured studying workflows.

RMP RAG

github.com/SalmaanRauf/RMP_RAG

2024

- Developed a retrieval assistant with Next.js, Pinecone, and OpenAI to answer professor research questions with vector-backed context.

PantryTracker

github.com/SalmaanRauf/React-Inventory-Manager

2024

- Built a React / Next.js household inventory tracker for practical pantry management and fast item updates.
